Electronics engineer, 1981. More than 25 years as a software engineer in Mainframe technologies at IBM; currently *(and for the last 3 years)*, he has been working as a fullstack web developer. In parallel to the functions described above, he has also developed a successful career as a project engineer *(for more than 20 years)*, in the implementation of microwave telecommunications networks and electronic security systems. His academic training is complemented with thirteen specialization courses in Venezuela *(IBM)* and five in the USA *(Applied Data Research (3) and Computer Associates Inc. (2))*. Lecturer in most of the technology congresses "IDEAS", by its acronym: *(Intercambio De Experiencias Anuales de Software)*; held at the Caracas Hilton Hotel; listener in two international congresses: *System Software Conference, New Jersey, USA, 1988 and CADRE, New Jersey, USA, 1989*; in addition to several in Venezuela: *IESA (2006, 2011), UNEFA (2006), Electronic Government (2005), La Red del Estado (2004)*. More than four decades of technical and managerial trajectory, which could be summarized as follows: System Programmer in the banks: B.N.D. *(until 1981)* and Banco Maracaibo *(until 1984)*; Director of system software in ABACO, representative for Latin America of Computer Associates Inc. *(until 1991)*; Co-founder of CYCS Computing Specialists, a consulting company providing specialized services in the area of *'System Programming'*, for clients with IBM Mainframe technology *(until 2011)*; During these last two stages, he led the implementation of complex technical projects in twelve banks in Venezuela and one abroad *(Banco Invercredito, Bogota, Colombia)*, as well as in nine industrial companies *(Lagoven, CVG, Alcasa, Interalumina, RCTV, Procter and Gamble, among others)*, in six governmental entities, including one abroad *(Registro Nacional del Estado, San José, Costa Rica)*, in four police agencies *(PTJ, DISIP, GN of Venezuela and Police of Vargas)*, in one military base *(Turiamo Naval Base)*, and in three telecommunications companies *(CANTV, Comsat and CCOM)*. Co-founder of CYCS Ingeniería e Instalaciones "https://cycs.netlify.app" *(until 2020)*; systems integrator company, in the areas of telecommunications and electronic security systems. During this last stage, he implemented projects of high technical level in companies such as: *CARGILL de Venezuela, Industrias CEGASA, FITVEN 2013, MINCI, business towers such as: Parque Cristal, ABA and La Castellana*. Since early 2020, he has been training in many of the technologies that make up the web development ecosystem, such as: *HTML, CSS, Javascript, React, Node, Express, MySQL, MongoDB, Firebase, PWA, Python, Go, Git, Figma, etc.*, becoming a solid web developer. His progress and portfolio can be seen at: https://github.com/cycscarlos.
